QUZO

Intelligence Meets Decentralised Finance.

An AI-powered blockchain ecosystem connecting digital assets, Forex markets and intelligent trading.

EVM-COMPATIBLE · AI-POWERED · MULTI-MARKET · DECENTRALISED INFRASTRUCTURE

Ecosystem Pitch Deck

QUZO

THE VISION

Building a More Intelligent Financial Ecosystem

Financial markets are becoming increasingly digital, connected and data driven. Yet trading infrastructure remains fragmented across centralised exchanges, Forex platforms, blockchain networks and separate financial applications.

> QUZO aims to bring these experiences closer together through a unified EVM-compatible ecosystem for digital assets, AI-powered trading intelligence and connected financial applications.

OBJECTIVES

01 Make advanced trading intelligence more accessible

02 Connect crypto and Forex market infrastructure

03 Enable transparent blockchain-based financial applications

04 Give users greater control over digital assets

05 Build for developers and financial application partners

QUZO

THE QUZO SOLUTION

One Ecosystem. Multiple Financial Capabilities.

01 OUZO CHAIN

EVM-compatible blockchain for smart contracts and dApps.

02 OUZO AI

Market analysis, insights and configurable strategies.

03 OUZO TRADE

Interface for supported crypto and Forex integrations.

04 OUZO DEFI

Planned swaps, liquidity and decentralised applications.

05 OUZO WALLET

Digital-asset management and ecosystem access.

06 OUZO LIQUIDITY

Planned liquidity coordination for supported apps.

QUZO

THE PROBLEM

Financial Markets Are Still Fragmented

01	**Fragmented Market Access**	Crypto and Forex generally operate through separate platforms and providers.
02	**Complex Trading Decisions**	Participants interpret large volumes of information and market movements.
03	**Limited Intelligent Automation**	Many traders lack configurable AI tools and transparent execution controls.
04	**Disconnected Infrastructure**	Wallets, trading platforms, liquidity and dApps often operate independently.
05	**Trust & Transparency**	Users need visibility into permissions, execution, risks and asset movements.

QUZO | QUZO BLOCKCHAIN

Bringing Artificial Intelligence into Trading

QUZO AI is designed as the intelligence layer: processing market information, identifying patterns and helping users make more informed trading decisions.

01 Market data analysis
02 Technical indicator interpretation
03 Trend and volatility analysis
04 AI-generated trading insights
05 Strategy configuration
06 Risk parameter recommendations
07 Portfolio and market monitoring
08 Execution support via authorised integrations

AI-ASSISTED TRADING

AI analyses market conditions → Generates insights and trade suggestions → User reviews and decides

HUMAN DECISION

AUTHORISED AUTONOMOUS TRADING

User authorises an agent → Explicit permissions and risk limits → Permitted execution via supported integrations

Revocable authorisation

SAFEGUARDS | Capital allocation • Maximum-loss parameters • Exposure & leverage limits • Restricted execution • Revocable authorisation • Activity monitoring

QUZO | QUZO BLOCKCHAIN

EVM-Compatible Infrastructure for the Next Generation of Finance

QUZO is planned as an EVM-compatible blockchain, allowing developers to build and deploy smart contracts using familiar Ethereum-compatible development tools.

CAPABILITIES

- **EVM-compatible** smart-contract execution
- Support for decentralised applications (**dApps**)
- Digital-asset and token infrastructure
- Compatible wallet and developer tooling
- Smart-contract-based ecosystem services
- Transparent on-chain transaction records

QUZO

THE QUZO ECOSYSTEM

Six Components.
One Connected Vision

QUZO Chain
Underlying blockchain infrastructure

QUZO AI
Market intelligence and configurable automation

QUZO Trade
Supported crypto and Forex integrations

QUZO Wallet
Digital-asset management

QUZO DeFi
Decentralised financial applications

QUZO Liquidity
Liquidity coordination for supported applications

QUZO

CRYPTO + FOREX CONNECTIVITY

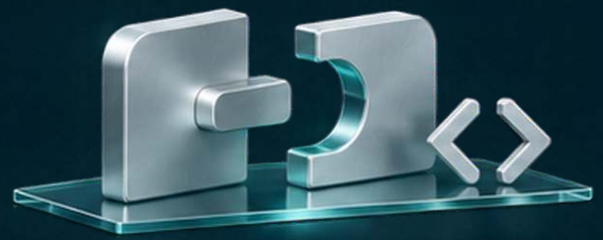

Designed for a Growing Financial Technology Community

01	RETAIL TRADERS	Market intelligence and supported trading applications.
02	CRYPTO USERS	Digital assets and compatible blockchain applications.
03	FOREX PARTICIPANTS	Market information and broker-connected services.
04	DEVELOPERS	EVM-compatible smart contracts and applications.
05	LIQUIDITY PROVIDERS	Eligible liquidity programmes, subject to design and requirements.
06	STRATEGIC PARTNERS	Market data, trading infrastructure, wallets and fintech services.

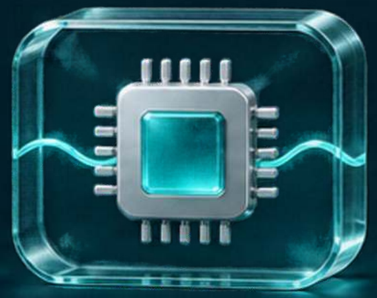

A Different Approach to Financial Technology

SIX REASONS / ONE CONNECTED VISION

01 **EVM COMPATIBILITY**

Familiar smart-contract infrastructure and developer tooling.

02 **AI-DRIVEN INTELLIGENCE**

Proposed intelligence for analysis and authorised automation.

03 **MULTI-MARKET VISION**

Aims to connect crypto applications with Forex infrastructure.

04 **CONNECTED ECOSYSTEM**

Blockchain, AI, wallet, trading and DeFi in one project vision.

05 **FIXED MAXIMUM SUPPLY**

Proposed maximum supply of 5 million QUZO.

06 **LONG-TERM DEVELOPMENT**

Phased roadmap for infrastructure, integrations, security and growth.

OUR AMBITION **Intelligent tools and decentralised infrastructure working together.**

TECHNOLOGY & SECURITY FRAMEWORK

Security Must Be Built into the Architecture

CONCEPTUAL LAYERS / PROPOSED CONTROLS

CONCEPTUAL ARCHITECTURE

01 APPLICATION LAYER
Wallet • trading interface • ecosystem dashboard • developer apps

02 INTEGRATION LAYER
Supported exchanges • brokers • liquidity providers • third-party services

03 RISK MANAGEMENT LAYER
User limits • permissions • exposure controls • execution restrictions

04 DATA & ORACLE LAYER
Market data feeds • external information • validation and monitoring

05 AI INTELLIGENCE LAYER OFF-CHAIN
Off-chain market analysis • model processing • strategy evaluation

06 BLOCKCHAIN LAYER ON-CHAIN
EVM-compatible execution • smart contracts • on-chain settlement

SECURITY PRIORITIES

Across the architecture

- Independent smart-contract audits
- Secure key management
- Restricted, revocable AI permissions
- Monitoring and incident response
- Data-source validation
- Transparent risk disclosures

Proposed architecture; controls and audit status must be evidenced before any production-security claim.

QUZO

Utility Designed Around Actual Ecosystem Activity

PRINCIPLE

Build sustainable utility through real application usage—not promises of price appreciation.

01 NETWORK ACTIVITY

Potential transaction fees and smart-contract activity.

02 AI SERVICES

Potential utility for supported AI services and agent operations.

03 TRADING APPLICATIONS

Eligible trading tools and ecosystem services may support QUZO payments.

04 DEFI APPLICATIONS

Compatible applications may use QUZO in approved DeFi mechanisms.

05 DEVELOPER ECOSYSTEM

Grants and incentive programmes may support builders.

06 GOVERNANCE

Eligible holders may participate in selected governance processes.

QUZO

A Fixed Maximum Supply of 8 Million QUZO

Ecosystem Growth & Rewards
25% | 2,000,000 QUZO

Liquidity & Market Development
15% | 1,200,000 QUZO

Treasury & Operations
15% | 1,200,000 QUZO

Core Team & Contributors
12% | 960,000 QUZO

MAXIMUM SUPPLY

8,000,000 QUZO

TOTAL ALLOCATION: 100%

Strategic Investors
10% | 800,000 QUZO

Foundation & Development
10% | 800,000 QUZO

Marketing & Partnerships
8% | 640,000 QUZO

Advisors
5% | 400,000 QUZO

QUZO

COIN VESTING & RELEASE

Coin Distribution

Long-Term Alignment. Controlled Token Distribution.

A structured vesting and release plan designed for sustainable growth, market stability and long-term ecosystem success.

Proposed Schedule (Months from Token Generation Event)

Cliff | Release Window | Launch Allocation

Allocation / Proposed Terms	0	6	12	18	24	30	36	42	48
Ecosystem Growth & Rewards 48 months	48-month programme window								
Liquidity & Market Development 20% at launch, 80% over 12 months	80% over 12 months 20% at launch								
Treasury & Operations 12-month cliff + 36-month linear	12m cliff			36-month linear release					
Core Team & Contributors 12-month cliff + 36-month linear	12m cliff			36-month linear release					
Strategic Investors 6-month cliff + 18-month linear	6m cliff	18-month linear release							
Foundation & Development 12-month cliff + 36-month linear	12m cliff			36-month linear release					
Marketing & Partnerships 10% at launch + 90% over 24 months	90% over 24 months 10% at launch								
Advisors 6-month cliff + 24-month linear	6m cliff	24-month linear release							

Time-Bound Release

Proposed only, Final cliff dates, release intervals, TGE amounts and smart-contract implementation must be confirmed before publication.

QUZO

BUSINESS MODEL

Multiple Potential Ecosystem Revenue Channels

A diversified and scalable revenue model that connects blockchain infrastructure, financial services, AI and real-world adoption.

Network Services

Network-related fees from blockchain activity and transactions.

AI Services

Subscriptions and usage-based fees for premium AI functionality.

Strategic Partnerships

Commercial arrangements with wallets, exchanges, data providers and brokers.

Trading Integrations

Revenue-sharing or integration fees from authorized trading partners.

Developer Ecosystem

Infrastructure, deployment and enterprise integration services.

DeFi Applications

Fees from eligible decentralised finance services (e.g., staking, lending, yield).

KEY OUTCOMES

- Diversified Revenue Streams
- Scalable & Sustainable Growth
- Robust & Compliant Framework
- Real-World Adoption & Utility

QUZO

ROADMAP

From Infrastructure Design to Ecosystem Expansion

Five Proposed Phases / Development Sequence

01 FOUNDATION

- Finalise brand and architecture
- Confirm token design and tokenomics
- Research blockchain architecture
- Define AI requirements
- Establish security and compliance

02 DEVELOPMENT

- Develop EVM-compatible infrastructure
- Build wallet and interfaces
- Develop AI prototypes
- Establish data and oracle integrations
- Begin internal testing

03 TESTING & INTEGRATIONS

- Controlled testnet when ready
- Test contracts and network
- Integrate crypto data sources
- Explore authorized Forex brokers
- Security assessments and audits

04 ECOSYSTEM LAUNCH

- Prepare mainnet readiness
- Release supported wallet and apps
- Introduce eligible token utility
- Expand developer and partner participation
- Adoption programmes

05 GLOBAL EXPANSION

- Expand trading integrations
- Grow developer ecosystem
- Introduce DeFi apps
- Explore fintech partnerships
- Develop governance participation

Proposed phases, not completed milestones. Add dates only after owners, budgets and dependencies are confirmed.

QUZO

The Future of Intelligent Decentralised Finance

We are building towards a connected financial ecosystem powered by blockchain infrastructure, AI intelligence and multi-market access.

Explore the QUZO vision. Build with the ecosystem. Shape what comes next.
